It might just be the ipad that is stalling. Try holding the home and sleep buttons on the ipad together and see if that gets rid of the problem. If it does, give us a little more information and maybe we can help you fix it. My Android tablet's wifi problems: (And no, I'm not going to tell you how I got it to work. Ask Google. I just know how to get it to work.) Q: Converting Java Interfaces to Kotlin Interfaces I have an Android project with thousands of lines of Java code written in the style of an Interface. I'd like to convert those to Kotlin, but the only reference I've found for Kotlin conversions only seem to be of the type... interface CoolInterface{ void doStuff(); } but what I really want is something like... interface CoolInterface{ fun doStuff() } so is there a way to write it out in Kotlin? A: It's possible and you can write an adapter to do that. For example, you could create a coolAdapter class that inherits from Adapter: public class coolAdapter : Adapter { override fun getViewType(position: Int): Int { return when (position) { 0 -> 0 1 -> 1 2 -> 2 else -> 2 f678ea9f9e
